Dear Hiring Manager,

I'm nearing the completion of my collegiate studies in Software Engineering and am very interested in your Software Intern position. I'm looking to further develop my skills to become a full-stack engineer.

I have a strong background in C++ and Python programming from my coursework; I have a firm understanding of design patterns, data structures, UML, and diagram creation. I have supplemented my coursework with hands-on learning in web and app technologies like HTML, Javascript, CSS, React, Node.Js, Databases, and Flutter.

Throughout my studies, I have also gained substantial experience with Unit Testing and Test Driven Development. I'm confident that these skills will enable me to effectively troubleshoot and enhance the performance of your software products.

I'm excited about the opportunity to deepen my understanding of software development in a practical environment. I'm confident that this position will provide the hands-on experience I'm seeking, and in turn, I will bring my strong work ethic and eagerness to learn to your team.

Thank you for considering my application. I'm looking forward to potentially discussing this opportunity further.

Sincerely,

Carlos Lespin
